Doctor Appointment API Documentation

Production-Ready REST API for Flutter & Web Applications | Base URL: https://medora-apponment-5.onrender.com

1. Server Overview & Credentials

This API provides complete backend functionality for patient appointments, doctor scheduling, video consultations, and messaging. Password for all seeded accounts is: password123

Role	Email	Password	Permissions
Patient	patient@example.com	password123	Book appointments, chat, make payment
Patient	anu@gmail.com	password123	Alternate patient account
Doctor	dr.john@hospital.com	password123	Cardiologist (Slots, Consultations)
Doctor	dr.rahul@hospital.com	password123	Orthopedic Surgeon
Admin	admin@hospital.com	password123	Full Administrative Access

2. Flutter Integration Setup

Add this base configuration to your Flutter project (lib/services/api_service.dart):

```
class ApiConfig {
  static const String baseUrl = "https://medora-apponment-5.onrender.com";

  static Map<String, String> headers([String? token]) => {
    "Content-Type": "application/json",
    if (token != null) "Authorization": "Bearer $token",
  };
}
```

3. Authentication Endpoints (/api/auth)

POST **/api/auth/login** *[Auth: Public]*

Authenticate patient, doctor, or admin. Returns JWT token.

```
// Request Body:
{
  "email": "patient@example.com",
  "password": "password123"
}

// Success Response (200 OK):
{
  "success": true,
  "token": "eyJhbGciOiJIUzI1NiIsIn...",
  "user": {
    "_id": "671e...",
    "name": "John Doe",
    "email": "patient@example.com",
    "role": "patient"
  }
}
```

POST **/api/auth/register** *[Auth: Public]*

Register a new user account.

```
// Request Body:
{
  "name": "Ansil Sherin",
  "email": "ansil@example.com",
  "phone": "+919876543210",
  "password": "password123",
  "role": "patient" // "patient" | "doctor" | "admin"
}
```

4. User Profile Endpoints (/api/users)

GET **/api/users/profile** *[Auth: Bearer Token]*

Get logged-in user profile information.

```
// Success Response (200 OK):
{
  "success": true,
  "user": {
    "_id": "671e...",
    "name": "John Doe",
    "email": "patient@example.com",
    "phone": "+1234567890",
    "role": "patient",
    "dateOfBirth": "1992-06-15",
    "gender": "male",
    "address": "123 Marine Drive, Kochi"
  }
}
```

PUT **/api/users/profile** *[Auth: Bearer Token]*

Update user profile details.

```
// Request Body:
{
  "name": "John Doe",
  "gender": "male",
  "dateOfBirth": "1992-06-15",
  "address": "Kochi, Kerala",
  "profilePic": "https://example.com/pic.jpg"
}
```

5. Specialists / Categories (/api/specialists)

GET **/api/specialists** *[Auth: Public]*

List all medical departments for home screen carousel.

```
// Success Response (200 OK):
{
  "success": true,
  "specialists": [
    { "_id": "671e...", "name": "Cardiology", "icon": "Ø>ÞÀ", "description": "Heart & Vascular" },
    { "_id": "671e...", "name": "Dentist", "icon": "Ø>Ý·", "description": "Dental Care" },
    { "_id": "671e...", "name": "Dermatologist", "icon": "Ø>ÝÔ", "description": "Skin & Hair" },
    { "_id": "671e...", "name": "Neurologist", "icon": "Ø>Ýà", "description": "Brain & Spine" },
    { "_id": "671e...", "name": "Orthopedic", "icon": "Ø>Ý´", "description": "Bones & Joints" },
    { "_id": "671e...", "name": "Pediatrician", "icon": "Ø=Üv", "description": "Child Healthcare" }
  ]
}
```

6. Doctors Endpoints (/api/doctors)

GET **/api/doctors** *[Auth: Public]*

List all doctors. Supports ?specialistId=... and ?search=...

```
// Query Options:
// GET /api/doctors?specialistId=671e... (Filter by specialty)
// GET /api/doctors?search=rahul       (Search doctor name)

// Success Response (200 OK):
{
  "success": true,
  "doctors": [
    {
      "_id": "671e...",
      "name": "Dr. John Smith",
      "photo": "https://...",
      "specialistId": { "name": "Cardiology", "icon": "Ø>ÞÀ" },
      "consultationFee": 500,
      "experience": 10,
      "qualifications": ["MBBS", "MD - Cardiology", "FACC"],
      "rating": 4.9,
      "about": "A renowned cardiologist with over a decade of clinical experience."
    }
  ]
}
```

GET **/api/doctors/:doctorId** *[Auth: Public]*

Get detailed profile of a single doctor.

7. Time Slots & Calendar (/api/slots)

GET **/api/slots/doctor/:doctorId** *[Auth: Public]*

Get available slots for a doctor on a specific date.

```
// Query Options: ?date=2026-10-28&available=true

// Success Response (200 OK):
{
  "success": true,
  "slots": [
    {
      "_id": "671e_slot_1",
      "doctorId": "671e_doc_1",
      "date": "2026-10-28",
      "time": "09:00 AM",
      "isAvailable": true,
      "isBooked": false
    },
    {
      "_id": "671e_slot_2",
      "doctorId": "671e_doc_1",
      "date": "2026-10-28",
      "time": "10:00 AM",
      "isAvailable": true,
      "isBooked": false
    }
  ]
}
```

8. Appointments Booking (/api/appointments)

POST **/api/appointments** *[Auth: Bearer Token]*

Book an appointment for a slot.

```
// Request Body:
{
  "doctorId": "671e_doc_1",
  "slotId": "671e_slot_1",
  "patientName": "Ansil Sherin",
  "age": 25,
  "gender": "male",
  "problem": "Chest discomfort after workout",
  "notes": "First consultation"
}

// Success Response (201 Created):
{
  "success": true,
  "message": "Appointment booked successfully",
  "appointment_id": "671e_appt_99",
  "amount": 500,
  "appointment": {
    "_id": "671e_appt_99",
    "status": "pending",
    "paymentStatus": "unpaid",
    "amount": 500
  }
}
```

GET **/api/appointments** *[Auth: Bearer Token]*

Get current user's appointments list.

GET **/api/appointments/:id** *[Auth: Bearer Token]*

Get single appointment details.

PATCH **/api/appointments/:id** *[Auth: Bearer Token]*

Cancel an appointment with reason.

```
// Cancel Request Body:
{
  "reason": "Personal emergency, need to reschedule."
}
```

GET **/api/appointments/:id/pdf** *[Auth: Bearer Token]*

Download appointment receipt slip as PDF.

9. Payments Flow (/api/payments)

POST **/api/payments/pay** *[Auth: Bearer Token]*

Instant payment simulation. Confirms appointment booking.

```
// Request Body:
{
  "appointmentId": "671e_appt_99",
  "paymentMethod": "upi" // "upi" | "card" | "netbanking"
}

// Success Response (200 OK):
{
  "success": true,
  "message": "Payment completed successfully",
  "booking_status": "confirmed",
  "appointment_id": "671e_appt_99"
}
```

10. Real-time In-App Chat (/api/chat)

POST **/api/chat/send** *[Auth: Bearer Token]*

Send a message to doctor or patient.

```
// Request Body:
{
  "recipientId": "671e_doctor_user_id",
  "message": "Hello Doctor, do I need to bring old prescription?"
}

// Success Response (201 Created):
{
  "success": true,
  "message": "Message sent successfully",
  "chatMessage": {
    "_id": "671e_chat_1",
    "message": "Hello Doctor, do I need to bring old prescription?",
    "isRead": false
  }
}
```

GET **/api/chat/conversations** *[Auth: Bearer Token]*

List all active chat conversations with unread counts.

GET **/api/chat/history/:recipientId** *[Auth: Bearer Token]*

Get chat message history with a specific person.

POST **/api/chat/mark-read** *[Auth: Bearer Token]*

Mark all messages from sender as read.

11. Video Consultation (/api/calls)

POST **/api/calls/start** *[Auth: Bearer Token]*

Start video or audio consultation call.

```
// Request Body:
{
  "appointmentId": "671e_appt_99",
  "callType": "video" // "video" | "audio"
}

// Success Response (200 OK):
{
  "success": true,
  "call": {
    "roomId": "room-671e_appt_99",
    "status": "ongoing",
    "callType": "video"
  }
}
```

POST **/api/calls/:callId/end** *[Auth: Bearer Token]*

End call and submit optional rating & feedback.

```
// Request Body:
{
  "feedbackRating": 5,
  "feedbackComment": "Excellent consultation by Dr. John."
}
```
